## Kurse Oral Sciences

### Coordinator:

apl. Prof. Dr. Jan Kühnisch

[jkuehn@dent.med.uni-muenchen.de](mailto:jkuehn@dent.med.uni-muenchen.de)

### Introduction to Oral Sciences (3 ECTS)

The block seminar will be held specifically for all new PhD students at the Dental School and will introduce them to a broad variety of dental topics. The spectrum covers all disciplines in dentistry – conservative, prosthodontic, orthodontic, paediatric dentistry and oral-maxillo-facial surgery – and will provide up-to-date knowledge to understand ongoing scientific trends in dentistry and related areas. Beside this, we will improve the scientific skills of our students with the aim that they can prepare their own presentations, read scientific articles and develop an own systematic review of literature. The lectures will be held by (assistant) professors of the dental school. The course last two weeks and could be of interest for (individual) PhD students at the MMRS or those students working on dental topics.

### Date:

Beginning of each winter semester (end of September/ beginning of October)

### Duration:

2 weeks, Monday-Friday from 9am until 4pm

### Location:

Dental School of the LMU Munich

### Participants:

Maximum 15
